## Portable Transport Cart

**D**esigned to move materials and mixtures from room to room or building to building. The Transfer Parts Cabinet maintains an absolute clean environment. The 2430 (pictured) is battery operated for complete independence from exterior power, or may be powered electrically to provide horizontal laminar flow throughout the critical storage area.

- Used to transport clean parts from station to station or from one clean area to another
- Eliminates incidence of contamination of parts in transit
- Maintains parts in a "Dust Free" condition without costly individually sealed packaging
- Interlocking devices activate air handling system

### CONSTRUCTION:

Novaply, laminated with formica or equal on all exterior surfaces  
Vinyl coated on all interior surfaces Shelves of either formica or plexiglass Doors of plexiglass

### AIR FLOW:

Per Federal Standard 209b — 90 F P M ± 20 F P M

### MOTOR:

Powered by 12 Volt, storage battery and recharged by trickle charger. Battery good for approximately 4 hours of continuous use.

### ELECTRICAL:

110 volt, 60 cycle, single phase.

### FILTERS:

Two stage — Prefilter 35% efficient. HEPA filter 99.97% effective on all particles 0.3 micron or larger.

### OPTIONAL FEATURES:

Stainless steel shelves Custom requirements and sizes available Optional interior lighting and UV. Lights work only when plugged into 110 volt system Stainless steel over plywood construction Magnehelic gauge
